

RL1000 with Base Station

The RL1000 is recommended for lawns of up to 12,900-17,200ft² (depending on grass type and condition).

Robomow[®] RL1000 is an automatic lawnmower that cuts the grass all by itself. All you have to do is schedule a weekly program. It will depart from the Base Station at the pre-set scheduled days and times. At the end of each operation Robomow[®] returns to the Base Station for charging until the next scheduled operation. Your lawn will be maintained even when you are away from home!

RL1000 is the top of the range model and is designed to mow big domestic lawns.

- 53cm Heavy-Duty 3-blades mulching system
- Best selling Robomow in 2006 and 2007
